Call

Apply

Bind

Poly ficn of <u>Call</u>, <u>Apply</u> & <u>Bind</u>.

Starting at Sharp 9:15 PM.

(this)

Person1 → John, 25

Print Age & Name() {

this

}
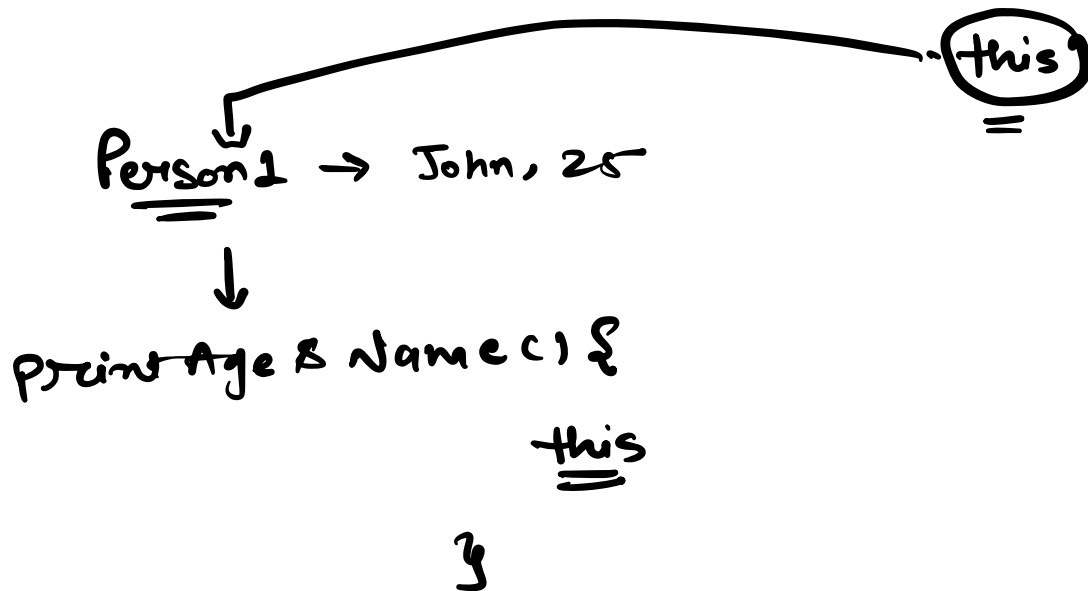

Person1. print Age & Name() → John, 25

Call.

this ⎯⎯⎯⎯⎯⎯

Person 1   Person 2

Person 1. printAgeAndName. call (person 2) ✓

Adam, 20.

You Attach call; Apply or Bind method
with a method of an object or a function.

To write a polyfiy for call method keep
these things in mind

1) Context → object for which it will
            be called

2) function Prototype — here we need to
            insert the polyfiy

3) This keyword — This keyword should point to
    the method we want to call.
